

# INDEPENDENT LEARNING CYCLE

(choice, control, self-reflection)

- Daily review of work covered
- Extra time on things you find hard now rather than waiting till exam time to try sort it out
- Using other resources textbooks, study guides

- Exploring a topic in greater depth or breadth
- Looking at a topic from a different perspective or angle

- Feedback in class, or on a task or in general?
- Do I need to change my approach?
- Should I re-do a particular piece of work?
- Should I now do extra work on an area?
- What additional help do I need to ask for?

- Consider the steps in the RESEARCH cycle – what could you do in advance for an upcoming task?
- Consider the steps in the REVIEW cycle – what could you do in advance for an upcoming task? – Especially STUDY NOTES

- SSH site for example:
  - Time Management Skills
  - Presentation skills
  - Making study notes
  - Touch typing
